

Oakdale Electric Cooperative SUNNYOAK COMMUNITY SOLAR GARDEN

FREQUENTLY ASKED QUESTIONS

Oakdale Electric Cooperative has compiled a list of Frequently Asked Questions related to our upcoming SunnyOak Community Solar Garden. If after reviewing this FAQ you still have questions feel free to call us at 608-372-4131 or send an email to info@oakdalerec.com.

Q Why is Oakdale Electric Cooperative building a Community Solar Garden?

A To provide interested Oakdale Electric Cooperative members a viable and affordable option to purchase renewable solar energy on a voluntary basis.

Q How do I participate in the community solar project?

A You must sign a Solar Subscription Agreement and make a one-time payment for a subscription unit(s) in the amount of \$700 per unit. *Financing will be available at Oakdale Credit Union for qualifying members. Contact OCU at 608-372-3939 for more information.*

Q What is the size of the Community Solar Garden and where will it be located?

A The Oakdale Electric Community Solar Garden is 200 kilowatts. This project will be adjacent to the Dairyland Power Utility Scale Solar project that is 1,500 kilowatts. The Solar Garden will be located just south of the Whistling Wings Substation on State Road 80 in Necedah.

Q What is a subscription unit?

A A subscription unit is the equivalent of one solar panel of electricity producing capacity. Oakdale Electric Cooperative's solar garden will be comprised of 792 solar panels.

Q Are there any restrictions or limitations on who may subscribe to the Community Solar Garden?

A Yes. The subscribing member must have a residential account with Oakdale Electric Cooperative.

Q Is there a limit on how many subscription units a member can buy?

A Yes. Members are limited to subscription units to the lesser of 1) 50% of your previous calendar year electricity usage, or 2) Ten subscription units, whichever is less.

Q How much energy will each solar panel produce?

A Each solar panel is expected to generate approximately 475 kWh annually, but that is not guaranteed. Energy production will vary based on total sunshine and time of year.

Q How much will I be paid for the energy my subscription unit(s) produce?

A Payment will be solely in the form of a credit against your electric bill. Any kilowatt hour output for the unit will be credited at the residential retail rate. *For example: if your energy bill shows you are paying 11.40 cents per kilowatt hour (kWh) and your unit produces 40 kilowatt hours, your bill will be credited $\$0.114 \times 40 = \4.56 .*

Q How long is the contract?

A When you purchase a subscription to a unit, you will receive the energy output of that unit for 25 years.

Q Do I own the solar panels if I participate in the project?

A No, as a member you are not purchasing solar panels, you are purchasing the subscription units of the output of the solar garden for the 25 year life of the project.

Q What if I move?

A Subscribers will have 4 options:

1. Sell the subscription unit(s) back to the Cooperative.
2. Keep the subscription unit(s) with the existing home if the new member wants to purchase it.
3. Sell (or give) the subscription unit(s) to another qualified member that is already served by the Cooperative.
4. Transfer the subscription unit(s) to another one of your Oakdale Electric Cooperative accounts.

Q Can I file and collect the federal tax credit for the cost of each subscription unit in the solar garden I purchase?

A No. The project retains the tax credit and that is calculated into the price for the energy.

Q When will the Community Solar Garden be complete?

A Construction began in November 2016, and will be completed in 2017.
